PROFILE

Cybersecurity graduate from the University of Bahrain with practical experience gained through an internship at the Ministry of Interior and the successful completion of projects in cybersecurity, secure software engineering, risk management, blockchain, web development, and database systems. Experienced in developing secure applications, analyzing system requirements, designing databases, and applying security frameworks and risk assessment methodologies to real-world and academic projects. A collaborative, adaptable, and analytical problem solver with strong teamwork and project development skills, eager to contribute to a wide range of IT, software, cybersecurity, and technology-driven roles.

EDUCATION

09/2022 – 08/2026	Bachelor of Science in Cybersecurity <i>University of Bahrain</i>
06/2022	High School Diploma <i>Creativity private School</i>

LANGUAGES

- Arabic - Native
- English - IELTS 6.5

SKILLS

- | | | | |
|---------------------------|-----------------------------------|-------------------------------|-------------------------------------|
| • Problem Solving | • Critical Thinking | • Teamwork & Collaboration | • Communication |
| • Leadership | • Time Management | • Python | • C++ |
| • Threat Modeling | • java | • HTML/CSS | • GitHub |
| • Wireshark | • Risk Assessment & Risk Analysis | • Microsoft Office | • Database Management |
| • IT project coordination | • Network fundamentals | • Secure Software Development | • Information Security Fundamentals |

INTERNSHIP EXPERIENCE

06/2026 – 08/2026	IT Intern <i>Ministry of Interior</i> • Participated in asset inventory and verification by validating asset records and maintaining accurate documentation. • Updated asset databases, generated reports, and reconciled physical assets with digital records. • Utilized Microsoft Excel, Microsoft Access, and Microsoft PowerPoint for data management, reporting, and documentation. • Worked with internal information systems and databases to support daily operational processes and data accuracy.
-------------------	--

Projects

09/2025 – 05/2026	Thaghras – Packet Analysis Learning Platform Senior Project  • Collaborated in developing an interactive cybersecurity learning platform focused on packet analysis and network traffic investigation. • Built protocol-based learning modules and AI-generated cybersecurity scenarios using external AI APIs to enhance hands-on learning. • Developed backend functionality with Flask and SQLite, and contributed to the frontend using HTML, CSS, JavaScript, and Jinja2. • Utilized Scapy to generate and process PCAP files and integrated gamification features to improve user engagement and learning progression.
04/2026 – 05/2026	Enterprise Risk Assessment & Compliance Framework ITCY460 • Conducted a security risk assessment for a simulated FinTech organization, identifying security threats, vulnerabilities, and business risks. • Evaluated risk likelihood and impact to prioritize risks and support informed decision-making. • Developed mitigation strategies and compliance-focused recommendations aligned with enterprise security best practices.
04/2026 – 05/2026	TrustPension DApp Blockchain-Based Pension Management Platform • Designed a blockchain-based pension management platform to improve transparency, trust, and auditability of contribution records. • Defined system workflows, user roles, and access control mechanisms for key stakeholders. • Designed permissioned blockchain workflows, smart contract concepts, and system architecture to support secure contribution tracking and verification. • Developed Figma prototypes and user journey designs, contributing to the overall system architecture and user experience.
09/2025 – 11/2025	Tesla IT Audit Plan & Audit Program ITCY470 • Developed a risk-based IT audit plan for Tesla, assessing cybersecurity, AI systems, cloud infrastructure, and manufacturing platforms.

- Applied COBIT 2019, ISO/IEC 27001, and the NIST Cybersecurity Framework to evaluate risks and prioritize audit activities.
- Designed audit procedures, control testing approaches, evidence collection methods, and security recommendations.
- Contributed to business continuity, IT governance, and compliance assessments to strengthen organizational resilience.

10/2025 – 12/2025

Secure Focus | Secure Software Engineering Course Project (ITCY354)

- Collaborated in designing a secure productivity and collaboration platform with project management, messaging, and file-sharing features.
- Applied the SQUARE methodology to define security requirements and the STRIDE framework to identify potential threats.
- Developed security-focused system designs, mitigation strategies, and secure-by-design solutions.
- Created interface prototypes and system designs using Figma, integrating security principles throughout the design process.

11/2025 – 01/2025

News Retrieval Client-Server System | ITNE352

- Developed a Python-based client-server application to retrieve and display news sources and headlines using the News API.
- Implemented TCP socket communication and multithreading to support concurrent client connections.
- Integrated external APIs and JSON processing to retrieve and present news based on user-defined search criteria.
- Applied object-oriented programming (OOP) principles to develop a modular and maintainable client application.

LEADERSHIP & ACTIVITIES

11/2025 – 11/2025

AI GameDay-AWS Challenge

The AWS competition was held in partnership with the Royal Police Academy

11/2025 – 11/2025

The Arab International Cybersecurity Conference and Exhibition (AICS)

Organizer in University of Bahrain workshop

10/2025 – 10/2025

3rd Asian Youth Games-2025

Volunteer in IT department

08/2025 – 08/2025

The transformative power of Artificial Intelligence in Entrepreneurship

Youth City Program

02/2023 – 10/2023

Young Parliamentarian Program Participant

08/2022 – 08/2022

Keys 2030 program

01/2022 – 02/2022

Tatawwar Program Participant

11/2020 – 04/2021

Certificate of Participation in the Secondary Schools SDG for Innovation and Entrepreneurship

Awards

Second place - Batelco Digital BootCamp

Awarded second place in a digital skills development program focused on technology, innovation, and problem-solving.

Judges Award – VEX Robotics Bahrain Competition

Recognized for creativity, teamwork, and problem-solving during the VEX Robotics Bahrain Competition.

First Prize – Latifa bint Mohammed Rashid AlMaktoum Award for Childhood Creativity Competition

Awarded first place for writing a research report on the life and contributions of Imam Al-Bukhari.
